Re: 4-Way STOP, Washington Street & East Britannia Street

Mayor Crowley and Councilors;

The new STOP signs placed at the intersection of Washington Street and East Britannia Street have been removed and stored at the DPW yard on Ingell Street. The lenses for the flashing overhead lights have been delivered and stored at the TMLP yard. At this time there is no immediate plan for their installation.

The 4-Way STOP condition was an effort by the DIRB to reduce the accident rate at this intersection which, a 2001 SRPEDD study called "the most dangerous intersection in Southeastern Massachusetts". The DIRB conditioned Walgreen's to conduct an analysis of the 4-Way STOP and, if warranted, erect the signs and change the flashing signals. It was the intention of the DIRB that the proponent would petition the City prior to making these changes. Miscommunications between the contractor and the City led to the signs being installed.

With the signs and signal lenses being delivered to the City, the DIRB considers Walgreen's obligations met, with regards to this intersection. In order to complete the process, the Engineering office will forward a request to consider the 4-Way STOP to the Police and Licensing Committee. At that time I will state the reasons for the request, the results of the traffic analysis, and potential drawbacks. The new signs and signal changes will only be installed if and when the relevant ordinance changes have been made.

Sincerely,
City of Taunton
